

Geoscience Services

EPI Geoscience is a leading provider of exploration, appraisal & development services, with more than 20 years' track record of adding value through delivering excellence and innovation to clients and partners worldwide.

EPI provides the full spectrum of Geoscience Services, on an individual project basis or through our unique Outsourced Exploration Department™ (OExD®) solution.

Full Spectrum of Geoscience Services

- Seismic Interpretation & Mapping
- Prospect Inventory & Resource Evaluations
- Specialist Seismic - QI
- New Ventures / Due Diligence / Basin Screening
- Play Fairway Analysis
- Structural Geology
- Sequence Stratigraphy & Sedimentology
- Charge / Basin Modelling
- Geochemistry
- Fieldwork
- Potential Fields

Integrated Field Development Services

- Seismic Sequence Stratigraphy & Facies Modelling
- Core Analysis & Logging / XRD Facies / Petrography
- Reservoir Modelling, History Matching & Forecasting
- Petrophysics
- Reservoir Engineering
- Performance Engineering Optimisation

Global Track Record

EPI Geoscience has a 23 year / +400 project track record for clients around the world, from private E&P & AIM listed companies to Super-Majors. Our highly experienced experts have deep technical expertise in the analysis of both conventional and 'unconventional' (continuous resource) plays around the world. We possess significant exploration, appraisal and development experience interpreting, modelling & successfully understanding complex basins and reservoirs.
