We are seeking Site Investigation Client Representatives – Geophysical and Geotechnical. Previous offshore and/or wind farm experience required.

Specific responsibilities will include:

- Supervision of site investigation surveys, on behalf of client.
- Supervision of data acquisition, ability to understand scope of work, ensuring implementation of project technical and safety requirements.
- Attend daily meetings for planning and progress.
- Provide daily update reports.
- Evaluation of contractor performance, not limited to: personnel, vessel, equipment, HSE, deliverables and ability to manage scope of work.
- Ensure key dates and protocols are met.
- Evaluation of scope of work (feasibility), future improvements.

Qualifications & Experience:

- Degree in Geology, Geophysics, Geotechnical Engineering, Surveying, a related field or relevant experience.
- Strong technical, HSE and organizational skills.
- Previous client representative experience, expertise in site investigations, cable routes, renewable projects, or infrastructure a must (3-5 years minimum).
- Valid BOSIET and offshore medical (UKOOA/OGUK), or other related certificates.
- Proficiency with software tools (Word, Excel, data entry software).
- Excellent communication skills (verbal and written)
