

Offshore HSE Consulting Services

We provide pragmatic and effective Health, Safety and Environment (HSE) consultation services to enable our clients to progress their projects quickly, safely and within budget. Our HSE personnel all have in excess of 15 years experience in the marine environment and provide the highest level of HSE management consulting, specific to the offshore wind sector, including:

- Offshore Heavy Lift Supervisor
- Master Mariner
- Ship Inspections
- Specialist Rope Access
- UXO Superintendent
- Crisis Management Practitioner

EPI Provides Strategic HSE Support in the following areas:

- HSE policies and management strategies and activities among the project lifecycles
- Development, planning, implementation, updating, review, and auditing of the HSE Management System
- ISO standards 9001, 14001 and 45001 implementation and auditing
- Proper identification of qualified HSE resources to be allocated to projects
- Communicate and promote the company HSE principles and culture
- Offshore projects, vessels, cable laying, diving and ROV spreads
- Preparation and maintenance of HSE Management Systems
- Auditors qualified to industry recognised standards – e.g. IMCA/OVID
