

# UXO Risk Management Capability Statement

# How can EPI help you?

EPI can help reduce your UXO risk with a proven Risk Management process on land or in the maritime environment.

Our UXO team provides a range of mitigation consulting services from UXO hazard and risk assessments, comprehensive risk mitigation strategy through to ALARP sign-off certification.

EPI provide suitably experienced and qualified professionally consultants as Client Representatives for UXO Surveys or UXO identification and clearance campaigns.

# Services

Our in-house EOD/UXO specialist provides management and oversight of client's UXO Mitigation processes, from the preliminary threat assessment through to the ALARP sign-off certificate.

Through our highly experienced, ex-military bomb disposal personnel, we provide the following UXO specialist project resources:

- Initial UXO threat (desktop study) and risk assessments for clients' sites.
- Risk mitigation strategy based on the UXO risks and planned work on site.
- UXO Project advisors to work with clients developing their UXO mitigation plans.
- UXO Survey Client Representatives for UXO survey campaigns (on or offshore).
- UXO Investigation/Disposal Client Representatives for offshore UXO Investigation and disposal campaigns.
- UXO Engineers for on site or remote support.

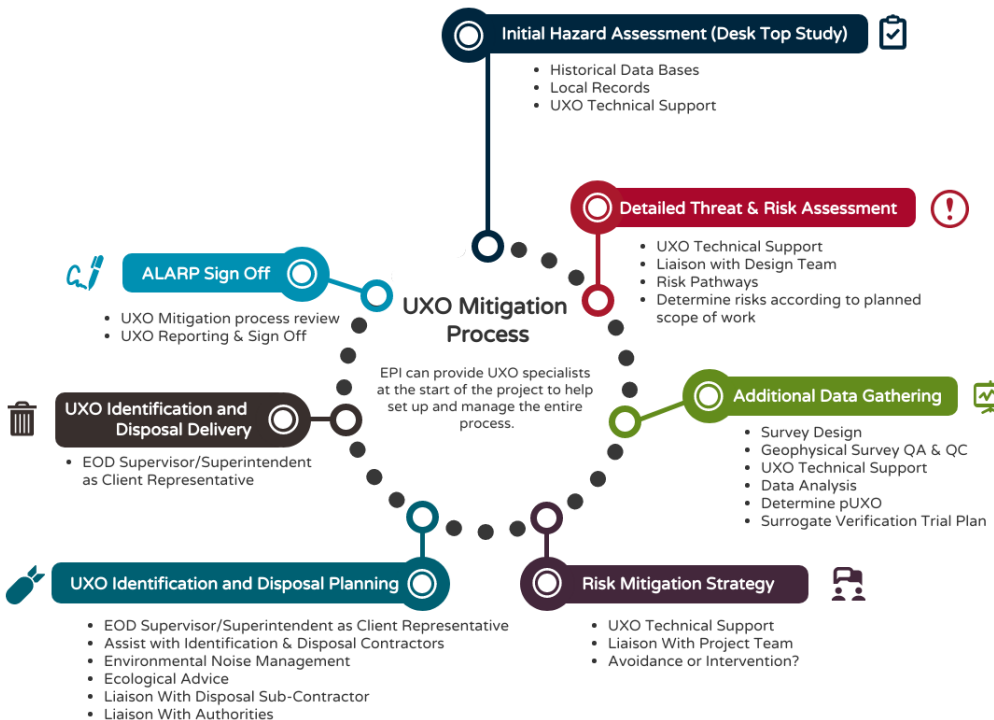

# Project Specific Process

EPI's methodology is to conduct a comprehensive initial UXO threat assessment (or desktop study) covering the specific project area. Following risk mitigations assessments and strategies will then be based on this information. Therefore, ensuring that the specified risks are pertinent to the project area, and not the general area or regional, which will assist in reducing the cost and time to the project, by excluding inappropriate and false reference data.

Our in-house technical team, are there to support our clients from the start to the finish of each project. As a small specialist consultancy, we pride ourselves in that you will be working with the same people on each project, available to you at any time.

# UXO Risk Mitigation Process

# Major Clients

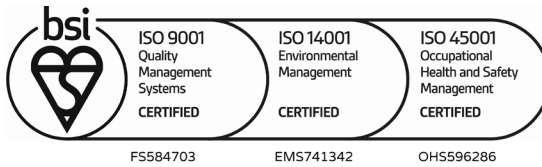

Our clients are as diverse as the services we offer, from the oil majors to smaller companies, survey contractors and renewables.

“EPI provided us with an experienced and knowledgeable team, focused on our specific requirements, enabling peace of mind to us, and a cost effective and safe outcome for our project.”

US based Wind Project Development Company
