

The Technical Specialists

EPI offer support and supervision throughout the project life-cycle, from initial feasibility studies and scoping through to decommissioning. Not only are we able to provide consultants, but we have the technical expertise in-house to offer reassurance and project management for the wind sector – both fixed and floating.

The EPI team and consultants support the following scopes:

- Client Representative - Geotechnical
- Client Representative - Geophysical
- Client Representative - Environmental
- Client Installation Representative
- UXO Survey Client Representative
- UXO Project Advisor
- QHSE Auditor
- Vessel Auditor
