

Quality Control System

EPIQC™ is a unique quality control system pioneered by the EPI Group.

EPIQC™ defines an operating procedure suite and toolkit, that utilises best-in-market bespoke software packages, to offer complete **24/7 project oversight**, and optimised project quality consistency across the entire duration.

The system standardises workflows, improves worldwide collaboration, communication, and efficiencies, and streamlines common project issues within the market.

Our unique to market process ensures every project is reassuringly delivered error free, and to our optimal and exacting industry-leading standards - 'The EPI Way'.

Geotechnical

Environmental

QHSE

Seismic

Geophysical

Key Features

- 1. Real-time Project Tracking**
- 2. 24/7 Globally Available Project Stats**
- 3. Standardised Daily Reports**, tailored to client needs
- 4. Contractor Performance Tracking**
- 5. File Sharing & Data Transfer**
- 6. Unified Quality Processes** across all Consultants & Reps
- 7. Dedicated EPI Project Specialists**

Key Benefits & Outcomes

- 1. Constant, Global, Real-time Project Oversight**
